August 19, 2011

To whom it may concern,

It is the policy of the American Society for Biochemistry and Molecular Biology to allow reuse of any material published in its journals (the Journal of Biological Chemistry, Molecular & Cellular Proteomics and the Journal of Lipid Research) in a thesis or dissertation at no cost and with no explicit permission needed. Please see our copyright permissions page on the journal site for more information.

Best wishes,

Sarah Crespi

Copyright Permission Policy

These guidelines apply to the reuse of articles, figures, charts and photos in the Journal of Biological Chemistry, Molecular & Cellular Proteomics and the Journal of Lipid Research.

For authors reusing their own material:

Authors need NOT contact the journal to obtain rights to reuse their own material. They are automatically granted permission to do the following:

- Reuse the article in print collections of their own writing.
- Present a work orally in its entirety.
- Use an article in a thesis and/or dissertation.
- Reproduce an article for use in the author's courses. (If the author is employed by an academic institution, that institution also may reproduce the article for teaching purposes.)
- Reuse a figure, photo and/or table in future commercial and noncommercial works.
- Post a copy of the paper in PDF that you submitted via BenchPress.
- Link to the journal site containing the final edited PDFs created by the publisher.

EXCEPTION: If authors select the Author's Choice publishing option:

- The final version of the manuscript will be covered under the Creative Commons Attribution license (CC BY), the most accommodating of licenses offered. Click here for details.
- The final version of the manuscript will be released immediately on the publisher's website and PubMed Central.

Please note that authors must include the following citation when using material that appeared in an ASBMB journal:

"This research was originally published in Journal Name. Author(s). Title. Journal Name. Year; Vol:pp-pp. © the American Society for Biochemistry and Molecular Biology."

For other parties using material for noncommercial use:

Other parties are welcome to copy, distribute, transmit and adapt the work — at no cost and without permission — for noncommercial use as long as they attribute the work to the original source using the citation above.

Examples of noncommercial use include:

- Reproducing a figure for educational purposes, such as schoolwork or lecture presentations, with attribution.
- Appending a reprinted article to a Ph.D. dissertation, with attribution.

For other parties using material for commercial use:

Navigate to the article of interest and click the "Request Permissions" button on the middle navigation bar. (See diagram at right.) It will walk you through the steps for obtaining permission for reuse.

Examples of commercial use by parties other than authors include:

- Reproducing a figure in a book published by a commercial publisher.
- Reproducing a figure in a journal article published by a commercial publisher.

PERMISSION/LICENSE IS GRANTED FOR YOUR ORDER AT NO CHARGE

This type of permission/license, instead of the standard Terms & Conditions, is sent to you because no fee is being charged for your order. Please note the following:

- Permission is granted for your request in both print and electronic formats, and translations.
- If figures and/or tables were requested, they may be adapted or used in part.
- Please print this page for your records and send a copy of it to your publisher/graduate school.
- Appropriate credit for the requested material should be given as follows: "Reprinted (adapted) with permission from (COMPLETE REFERENCE CITATION). Copyright (YEAR) American Chemical Society." Insert appropriate information in place of the capitalized words.
- One-time permission is granted only for the use specified in your request. No additional uses are granted (such as derivative works or other editions). For any other uses, please submit a new request.

If credit is given to another source for the material you requested, permission must be obtained from that source.

Hi,

I'd like to reprint figure 1 in my dissertation.

Thanks,

Dylan

Subject: Copyright Permission Request

Hi,

I'd like to reuse a figure from:

Proc Natl Acad Sci U S A. 2004 Jul 20;101(29):10548-53. Epub 2004 Jul 12.

Structure of HIV-1 reverse transcriptase bound to an inhibitor active against mutant reverse transcriptases resistant to other nonnucleoside inhibitors.

In my Ph.D. dissertation. I am writing to request permission to do so.

Thank you,

Dylan Kennedy

Email: dk5z@virginia.edu

Dear Mr. Kennedy:

This is to grant you permission to reproduce the following figure in your thesis titled "Molecular Mechanisms of Adenosine A1 Receptor Allosteric Enhancers" for the University of Virginia:

> Figure 1 from R F Bruns, J H Fergus, L L Coughenour, G G Courtland, T A Pugsley, J H Dodd, and F J Tinney, Structure-activity relationships for enhancement of adenosine A1 receptor binding by 2-amino-3-benzoylthiophenes, *Mol Pharmacol* December 1990 38:950-958

Permission to reproduce the figure is granted for worldwide use in all languages, translations, and editions, and in any format or medium including print and electronic. The authors and the source of the materials must be cited in full, including the article title, journal title, volume, year, and page numbers.

Sincerely yours,

Richard Dodenhoff
