

The mechanisms of serotonergic signaling in *Drosophila*

Xenia Borue

Princeton, NJ

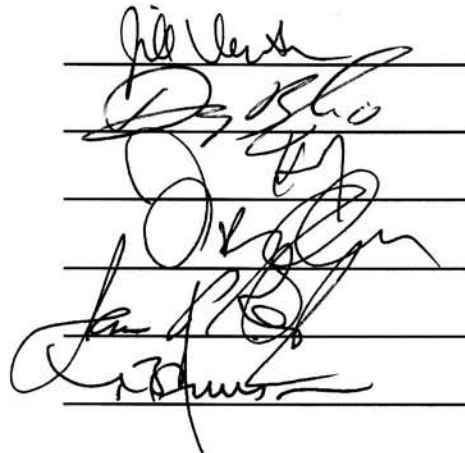

B. A. Chemistry and Biology, Cornell University, 2003

A Dissertation presented to the Graduate Faculty of the University of Virginia in
Candidacy for the Degree of Doctor of Philosophy

Neuroscience Graduate Program

University of Virginia

August, 2009

Handwritten signatures on a lined background. The signatures are written in black ink and are arranged vertically, overlapping the horizontal lines. The top signature is the most legible, appearing to read 'Jill Venter'. Below it are several other signatures, some of which are more stylized and difficult to decipher. The signatures are written on a background of horizontal lines, likely from a notebook or a form.
