

Science or Policy: What's Driving Perceptions of Climate Change in the U.S.?

Jacob Samuel Hughes

Charlottesville, VA

Bachelor of Science, James Madison University, 2004

A Thesis Presented to the Graduate Faculty of the University of Virginia in Candidacy
for the Degree of Master of Arts

Department of Environmental Sciences

University of Virginia

August, 2013

TABLE OF CONTENTS

List of Figures.....	iv
List of Tables.....	v
Acknowledgements.....	vi
1.0 Introduction.....	1
2.0 Public opinion on climate change.....	4
3.0 The scientific consensus on anthropogenic climate change.....	5
4.0 The scientific debate of the scale of climate sensitivity.....	6
4.1 Variability in climate sensitivity models.....	9
4.2 Scientific scrutiny and climate change.....	13
5.0 Public response to scientific debate over climate change.....	14
6.0 U.S. media coverage of climate change and global warming.....	17
7.0 Political affiliation and climate change perceptions.....	22
7.1 Increased political polarization and climate change perceptions.....	22
7.2 Political polarization by political elites.....	28
8.0 The effect of the recession of 200 on climate change perceptions.....	33

8.1 Economics as a deterrent for climate change mitigation.....	36
9.0 European public opinion on climate change.....	38
9.1 U.K's response to the 2008 recession.....	39
9.2 European Union's perceptions on climate change issues.....	39
9.3 Climate change perceptions since the recession: Europe vs. the U.S.....	41
10.0 Conclusions.....	48
References.....	50

LIST OF FIGURES

Figure 4.1- Temperature response of Earth to an atmospheric doubling of CO ₂	11
Figure 6.1- Overall tone and number of mentions regarding climate change on cable news.....	20
Figure 6.2- Percentage of shows vs. scientific agreement.....	20
Figure 7.1.1-Political polarization of global warming among Liberals and Conservatives.....	25
Figure 7.1.2 -Americans who believe global warming has already begun 2001-2010.....	26
Figure 7.1.3- Concern for global warming among Democrats, Independents and Republicans.....	27
Figure 8.1-Trends in public support about global warming, 1990-2010.....	34
Figure 8.2- The trend in favoring environment over growth with unemployment.....	35
Figure 9.2-Trends in perceptions of human-caused warming in America from 2006-2012.....	40
Figure 9.3.1-Respondents from Britain and the U.S. on various climate change questions.....	42
Figure 9.3.2-EU respondents on should taxation be based on energy use.....	47

LIST OF TABLES

Table 7.2-Organizational affiliations of “witnesses” at Congressional hearings (2005-2008).....31

Table 9.2-Do CO₂ emissions have only a marginal impact on climate change.....41

Table 9.3-Who in the EU is responsible for addressing climate change.....46

ACKNOWLEDGEMENTS

I thank my academic and thesis advisor, Dr. Stephen Macko, for his continued encouragement and feedback throughout the program. Without his assistance, this thesis could not have been accomplished.

I thank my committee members, Drs. Deborah Lawrence and Megan McGroddy, whose patience and insights while I meandered through several topics and ideas were invaluable.

I thank the University of Virginia for a high quality, hands-on education. The faculty and staff of the Environmental Sciences department have been exceptionally professional and encouraging. I feel truly blessed to have expanded my academic horizons at such a wonderful institution.

I thank my fellow Master of Arts candidates, particularly Rachael Stimis, Jesse Stanbridge, and Jarrod Boitet. Each of their different personalities and unique qualities helped guide me through the harder times and encouraged me to work harder. I share this thesis with them.

I thank my dear Catherine for her patience, encouragement, and wisdom. Her belief in me always surpassed the belief I had in myself and her support and understanding never wavered.

Finally, I thank my family for continuous support and belief. Their encouragement of me going back to school while working full time gave me the belief that I could not only survive graduate school, but thrive in it as well.

I find myself fully aware of how fortunate I am to have had this experience. To have learned more about the physical world I live in and ways in which to improve it is something I will take with me in the next phase of my life. For that I am truly grateful.
